

CAPABILITY STATEMENT · 2026

AI FIRST NATIONS

Building Indigenous-Led Environmental Resilience

Indigenous-led drone and AI environmental services, delivered by a Larrakia drone pilot and cultural ambassador who works the Country he surveys — certified aerial capability paired with applied AI, grounded in on-Country relationships across Far North Queensland, the Torres Strait and the Northern Territory.

Sole Trader · ABN 80 732 478 065 · **CASA ReOC** CASA.ReOC.8979 · **ARN** 1252905

Insured \$20M Public Liability · \$10M RPAS Third-Party Liability · \$2M Professional Indemnity (QBE)
Far North Queensland · Torres Strait · Northern Territory · aifirstnations.org.au

Creation. Connection. Contribution.

AI First Nations is the commercial drone and AI services practice of founder **John Fejo** — Larrakia man, CASA-certified Chief Remote Pilot, Head Ranger, cultural ambassador and Cert IV-qualified educator. Environmental monitoring technology is almost always built and flown by outsiders to Country. AI First Nations is the counterweight: certified aerial and AI capability delivered by someone who already carries cultural authority and standing relationships across the region.

01

Certified, not casual

CASA ReOC
CASA.ReOC.8979, ARN
1252905, authorised multi-
rotor RPAS aerial work up to
25kg. Backed by \$20M
public liability, RPAS liability
and professional indemnity
cover (QBE).

02

AI-backed, not guesswork

RMIT University partnership
delivering 97% accuracy
species classification
(EfficientNet-B0).

03

On Country, not fly-in

Delivered by a cultural
ambassador and Head
Ranger with standing
relationships across the
North.

Three pillars — the way we work

Every engagement is guided by Creation, Connection and Contribution: building real capability, working through genuine relationships on Country, and leaving a measurable contribution behind rather than a one-off report.

CREATION

CONNECTION

CONTRIBUTION

OUR PARTNERS

KJR

3-year Chief Remote Pilot officer engagement,
including the NSW SLSS Shark Monitoring
Program.

RMIT University

Research and AI development partner —
mangrove species classification and autonomous
sub-canopy systems.

Kushai

Strategic partner.

Goondoi Arts Aboriginal Corporation

Signed drone services partner — pond apple
injection, mowing and environmental monitoring.

Five capabilities. One operator.

Every engagement is flown and reported on directly by the Chief Remote Pilot — no subcontracted crews, no generic templates.

01

Drone Survey & Environmental Monitoring

Certified aerial survey for environmental, land management and infrastructure monitoring using a DJI Matrice 4T RTK (thermal + RTK precision).

FOR: COUNCILS, LAND COUNCILS, RANGER GROUPS, PRIVATE LANDHOLDERS

02

AI Species Classification

Mangrove and vegetation species identification models built with RMIT University, currently running at 97% accuracy (EfficientNet-B0).

FOR: ENVIRONMENTAL AGENCIES, RESEARCH PARTNERS, LAND MANAGERS

03

Cultural Heritage Documentation

Drone-based mapping and documentation of rock art and cultural heritage sites, conducted under appropriate cultural authority and protocol.

FOR: TRADITIONAL OWNER GROUPS, HERITAGE BODIES

04

Ranger & Biosecurity Support

Aerial support for ranger programs across Cape York and the Torres Strait, including biosecurity and marine debris monitoring.

FOR: RANGER GROUPS, NRM BODIES

05

Training & Education

School and community drone/AI education sessions connecting Indigenous knowledge with emerging technology, ranger and junior ranger skills programs, and pre-deployment / operational drone training for teams and partner organisations.

FOR: SCHOOLS, RANGERS & JUNIOR RANGERS, DISADVANTAGED YOUTH, COMMUNITY ORGANISATIONS, PARTNER OPERATIONS TEAMS

MAX RPAS AUTHORISED
(REOC)

KJR

3-year Chief Remote Pilot officer engagement, encompassing the NSW SLSS Shark Monitoring Program and Port of Townsville drone survey work.

RMIT

Mangrove species classification model, 97% accuracy (EfficientNet-B0); autonomous sub-canopy SLAM drone system in development for Semester 2, 2026.

SIGNED

Goondoi Arts Aboriginal Corporation — drone services agreement covering pond apple injection, mowing and environmental monitoring.

TENDER

Torres Shire Council — drone survey, Horn Island (landfill, rock stockpile and airport sites).

1

Discovery call

A short conversation on your site, your compliance needs and what you're trying to monitor or capture.

2

Scoped quote

A written quote referencing CASA ReOC.8979 and ARN 1252905, itemised by site and deliverable.

3

Delivery

Survey flown, data processed, report delivered — ongoing monitoring scoped from there.

John Fejo
